

# Taylor Made SYSTEMS™

*A Clear Advantage...  
In Marine Windshield & Glazing Systems*

A Member of  
THE TAYLOR MADE  
GROUP.

[www.taylormarine.com](http://www.taylormarine.com)  
...your window to pleasurable boating!

A large, glowing orange-red glass panel is being moved by a crane in a factory setting. The panel is suspended by several chains and is positioned vertically. The background shows industrial machinery and structural elements, with a blue and white striped pattern visible on the right side. The overall scene is illuminated with a warm, orange-red light, suggesting a high-temperature environment.

# TAYLOR MADE SYSTEMS ...A CLEAR ADVANTAGE

Taylor Made Systems utilizes proprietary, in-house glass tempering and furnace operations at our facilities in Payne, Ohio; Bradenton, Florida; and Templemore, Ireland. Our ability to transform raw glass sheets into curved, wraparound, tempered safety glass windshields gives boat manufacturers maximum design flexibility, providing a competitive advantage.

# AN OCEAN OF OPPORTUNITIES

Adherence to rigid quality standards is necessary in order to meet the demanding application requirements of marine glazing systems.

Three Taylor Made Systems facilities provide marine sewn products: Bradenton, Florida, (below) specializes in custom upholstered interiors and canvas products; Winter Springs, Florida, produces canvas boat tops; and Tifton, Georgia, manufactures shipping covers.

Taylor Made Systems sets the standard for design and engineering within the boating industry. With Pro/ENGINEER and AutoCAD, we have the ability to concurrently engineer any product directly with our customer prior to prototyping. Completely parametric 3D CAD models and drawings allow conceptual and preliminary designs to be completed quickly and accurately and transmitted instantaneously via FTP download or e-mail.

With Taylor Made Systems, boatbuilders have a myriad of glass shapes to choose from, offering the leading edge in innovation, materials, and styling. And our framing systems are bent and fabricated in our facilities, and they feature a variety of custom finishes, including powder-coated, polished silver anodized, mirror-quality stainless steel, or 6061/6063 aluminum alloy frame work.

We excel at helping boat designers realize their dreams, turning an idea into a masterpiece. With advanced CAD systems, we can work with IGES files, as well as CAD drawings or basic mock-ups. We'll assist you every step of the way for an end result that is always nothing short of spectacular.

Although we've made our mark with sophisticated, high performance windshields and window systems, whenever customers see the Taylor★Made® logo, they know that they are looking at a superior, well-made, beautifully functional product. For example, our hatches are engineered to meet the challenging rigors and harsh elements of offshore cruising and sailing. And our upholstery features the finest grade materials, expert craftsmanship, and such quality details as double-stitched piping.

Deftly balancing form, function and performance, Taylor Made Systems is dedicated to developing new products, processes, and technologies to keep our customers ahead of the competition. Perhaps that's why, nearly a century after Nelson A. Taylor first took a needle to canvas, we still see an ocean of opportunities on the horizon.

**E**ver since 1908, when Nelson A. Taylor put the finishing touches on his first custom canvas piece, the Taylor★Made® name has been known for its legendary quality, innovation, and unwavering commitment to customer satisfaction.

Our company grew and expanded quickly, along with our quest for innovation in new applications, processes, and products – including the introduction of the first wraparound acrylic windshield for motor boats.

Today, Taylor's entrepreneurial spirit, high standards of excellence, and dedication to customer service have firmly established us as the world's largest manufacturer of marine glazing systems and the undisputed leader in framed glass windshield technology. We also offer a large selection of custom-quality marine products, including canvas, deck hatches, portlights, and doors.

But success has not made us complacent. Our goal is to continue to meet – and exceed – your expectations in the years ahead by providing innovative, high quality, state-of-the-art solutions to the boating industry's toughest challenges... And that – clearly – gives you the OEM advantage.

Even with state-of-the-art materials and manufacturing processes, skilled workmanship in assembly is still a necessity to provide consistent, high-quality products that meet, and exceed, customers' demands.

Whether a bolster seat, helm chair, custom bow section or lounge sleeper bench, we start with the finest grade marine vinyl. Add custom logos and graphics, if desired. Then, craftsmanship, merged with computer precision, produces the ultimate upholstery solution for even the most challenging boat designs.

Utilizing proven powder-coating technology, Taylor Made Systems can provide an exact color match in a variety of durable, corrosion-protective finishes.

Taylor Made Systems utilizes a state-of-the-art coordinate measuring machine, allowing our engineers to accurately define customer windshield deck landings or patterns using advanced measuring techniques. This information is then easily transferable into our CAD systems for the beginning design stages.

An industry leader in the application of powder-coated finishes, Taylor Made Systems employs an advanced wash system to prep parts for painting. Strict quality control and attention to detail throughout the multi-step process help ensure the reliable performance and long service life of the coating, even in the harsh marine environment.

**W**e believe that our customers deserve nothing less than outstanding service, and we strive to earn your business – every day.

We're constantly reinvesting and expanding to keep pace with the market's growing need for innovative, high performance products. We currently have twelve facilities in the United States, Europe, and Australia and six strategically located regional sales offices, supported by a global network of distributors. We also have two dedicated glass tempering plants, fully equipped with state-of-the-art glass bending furnaces.

Customers know that our quality is second to none. Our tempered safety glass and systems are certified to meet ISO standards  $\text{CE}$  for strength and safety, and they adhere to recommendations made by the American Boat and Yacht Council.

Our leadership in glazed systems stems from our commitment to high standards and design innovation. From sport boat tempered glass windshields to heavy-duty construction welded window systems for motor yachts, convertibles, and express cruisers, our windshield and window products are system engineered to provide the best possible solution with Taylor★Made<sup>®</sup> tempered safety glass.

# SUPERIOR SERVICE... CUSTOM SOLUTIONS

Taylor Made Systems pioneered the welding of stainless steel, including 316L, which ensures an exceptional product on a consistent basis. Our in-house welding shops are equipped with state-of-the-art tig welders, capable of welding any size aluminum extrusion.
